18-03-2026

Agenda :

→ Mongo DB (Database)

→ Streamlit

Relational database → sqlite

→ supabase → postgres

DBMS → supabase

DBMS → SQL → postgres

SQL → sqlite

Non-relational datables → Mongodb → Atlas →

Mongodb → offline → setup

* Setup MongoDB Atlas
* python with MongoDB →
* python library to interact with Mongo DB.

AWS → ec2 → config → sumbit → system → login password

ec2 → service

config → sumbit

config → system

system → terminal (local)

Cluster → services → database

services → Mongodb

services → system

System → M10 → 0.08 $/hr
System → Flex
System → Free → select

select Yes to Add ip address

Your current IP address (xxxxxxxxxxxx) has been added to enable local connectivity. Only an IP address you add to your Access List will be able to connect to your project's clusters

project → user & password → cluster

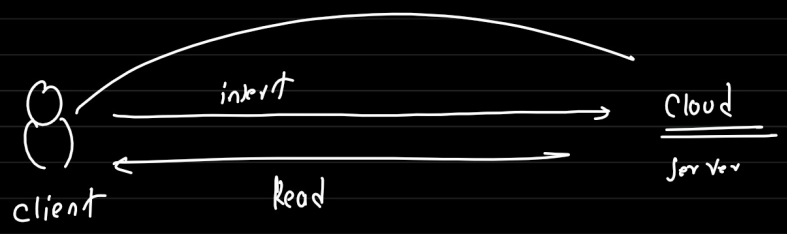
local → Mongodb
~~Cluster~~ Server → Mongo → database

Database → tables → columns
Database → tables

Database → collection → ~~row~~ document →
{ dict → json
}

Database → udsb2
Table → dummy0
insert data → row

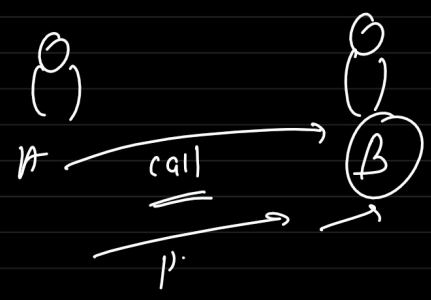
Database → udsb2
collection → dummy0
insert data → document → dict/json



supabase → connecting → uri ping

ping

ping → same → server is active



client ← uri → no error

12:00 AM

↓

query

↓

7 PM → ping

Relational database → SQL

postgres oracle DB

Mongo → $set, $gt, $regex, $options, $ty, $exist

.find, find one, insert one, insert many, delete many

Database

Create, update, Delete ← X

Read ← Team

downloads → .csv

Data Analysis

ML Algo → Deployment

Streamlit

library → UI components via python code

HTML + CSS ← API → python

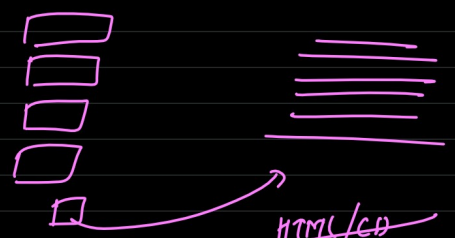
code

Button

web development

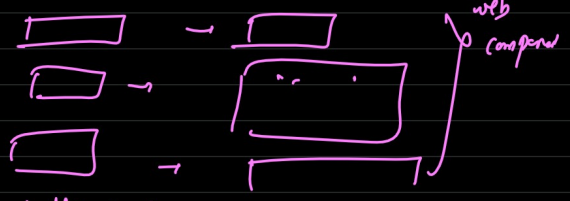
DS →

DS / AI → project



HTML/CSS

streamlit →



web component

prototype → production level

Applications →

gradio
streamlit → web application ← prototype
